Agrometeorological Advisory

Crop	Stage	Advisory
Winter Vegetable	Seedling	Seedlings are very much vulnerable to rotting due to disease infestation which can be mitigated by applying, Hexaconazole 5% WP+ Captan 70% WP@ 1.5 gm per lt of water.
Pointed Gourd	General	For new season planting before transplanting vine should be dipped into a solution of 3 gm of Carbendazib and Mancozeb mixture with one litre water for some time and thereafter keep it in a shade area for sometime before planting. Another thing farmer's friend should apply 5-7 gm Cabofuran to each pit.
Mustard	Sowing	Select some early variety of mustard for sowing like agrani, panchali, b-9etc. If moisture level in the field is proper then sow the seeds @800-900g/bigha. Before seed sowing apply Azophos@2kg/bigha with compost as field preparation. Before sowing treat the seeds with thirum@3g/kg of seed.
Potato	Sowing	Prepare land in harvested paddy field for early variety of potato like Kufri Jyoti, kufri lalima, kufri anand, kufri chipsona, Ashoka etc. Select seed with at least 2-3eye per seed tuber and with 20 g wt.
Lentil	Sowing	Apply basal fertilizer with 12:24:24 of N:P:K. Farmers who wants to cultivate it as single crop sow the seeds@8kg/bigha
