- Maximum temperature is expected to be around 32° - 34°C and minimum temperature is expected to be around 23-25° C.

Agrometeorological Advisory

Crop	Stage	Advisory
Kharif Rice	General	In this prevailing wether condition, there is a chance of spread of blast. As a control spray Hexaconazole @ 1.5 g/l of water. In case of Brown Plant Hopper attack spray Acephate @ 2 ml/l of water.
Cabbage & Cauliflower	General	To prevent damping off in seedbed spray Carbendazim 12% + Mancozeb 64% @ 2 gm/l of water. Keep the seedbed dry and weed free.
Chilli	General	Present temperature and humidity conditions are congenial for the rapid spread of thrips and mites leading to the leaf curling in chilli. As a control spray Difenthiuron @ 0.75g per litre of water at 7-10 days interval.
