Agrometeorological Advisory

Crop	Stage	Advisory
Aman Rice	Panicle initiation	Under present weather situation attack of leaf folder has been reported from many areas. As a control apply Triazophos @ 0.5 ml/litre or Chlorpyriphos 50% + Cypermethrin 5% @ 1.5 ml/litre of water. Increase the depth of stagnant water with age of crop. At the time of panicle initiation, keep 5 to 7 cm water in the field. In case of timely sown crop, at 3 weeks after transplanting, apply top dressing (@ 4.5 kg per bigha). Mix the fertilizer thoroughly with soil after proper intercultural operations. As per the forecast received from IMD, light to moderate rainfall may occur in next four days. So, Spraying should be done on a clear and dry day.
Mustard	Land preparation	Start land preparation with applying 15 Ton FYM with 10 kg Azotobactor + PSB. 60-90 kg Nitrogen, 60 kg P2O5 and 40 kg K2O per hectare. Use seeds like Agrani(B-54), Panchali (T.W.C.-3), B-9, and Rai-5, Bhagiroti (R.W.-351) etc. Seed treatment with Carbendazim 50% WP 2g /kg seed.
Vegetables	General	Sow seeds of winter vegetables. Treat seeds with Agrosan GN or Ceresan @ 2.0 g/kg seed. Cultivate radish, broccoli etc. Sow onion seed in the nursery bed. Under present hot and humid condition there are chances of fungal attack. To prevent fungal leaf-spot disease, apply 2.5 gm Mancozeb 75% or Chlortothalonil 0.1% mixed with one lt of water.
