Agrometeorological Advisory

Crop	Stage	Advisory
Turmeric	General	Leaf blotch of Turmeric to be sprayed with Azoxystrobin or Hexaconazole @ 1ml/lit. of water
Chilli	vegetative	For Aphid, hoppers, white fly apply Imidachloropid @1ml/5lit. of water or thiomethoxam @1g/3lit of water. For yellow mite apply propergite 2.5 ml/lt. of water.to control sucking pest of chilli apply Flubenamide 39.35% SC @ 4 ml/tank. To avoid damping off treat the seed bed soil with trichoderma mixed with organic manure @5g/kg and treat the seeds with thiram @2 g/ kg of seed before sowing. After emergence if there is death of seedlings, then apply copper oxy chloride as soil drenching @ 2g/lit. of water.
Cucurbits	Fruiting	Avoid contact of fruits with soil. Apply Azoxystrobin @ 1ml/lit. of water if there is rotting of fruits or vines. For white fly, hoppers apply Acetamiprid @ 1ml/lit. water. For red mite apply spiromesifen (pyromite) 1 ml/lt. of water. Avoid unnecessary application of toxic pesticides.
Duck	General	Succumb to have / DVH/ DP infection Routine Vaccine will protect duck population from mortality. Prebiotic and pro-biotic in feed increases the fast health and feed utilization.
Sheep and Goat	General	Cold climate is favourable for CCPP in goat which causes severe respiratory distress including pneumonia that may leads to death. Precaution to escape from direct coldness is preventive measure. Small ruminants and prone to pox virus. Immunization against this virus keeps the animal disease free and healthy.
