**Agrometeorological Advisory**

<b>Crop</b>	<b>Stage</b>	<b>Advisory</b>
Green gram	Sowing	Farmers are advised to sow green gram. Seed treatment with Rhizobium culture and phosphorus solubilizing bacteria is advised.
Green manuring crop	Sowing	Sowing of green manuring crop like cluster bean, dhaincha etc may be advised where harvesting of rabi crop is over. Ensure proper moisture for proper germination and growth of crop.
Mango	Fruit setting	In mango orchard, to prevent shedding of new fruits due to high temperature apply irrigation and spray NAA@ 5ml/10 lt. of water.
Onion	General	To prevent thrips spray Imidachlorpid@0.5ml/lt. of water.
Jute	Land preparation	Field should be ploughed and cross harrowed 5-6 times followed by planking until a fine seed bed with good tilth is obtained. Soil Moisture Should be 21-45%. In case of acidic soil liming should be done 4-6wks before sowing at the rate of 7-15 qha <sup>-1</sup> .
