Weather Warnings (Valid Till 08:30 IST of the next day)

no warning

Likely impacts of weather warnings on Agriculture and associated Agromet advisories

nil

General Advisory:

As per extended range forecast excess rainfall was recorded from 13.2.25 to 26.3.25. Based on MME forecast large deficit in rainfall is predicted from 28.3.25 to 10.4.25. Based on MME forecast Tmax will be above normal in Week 1 and in week 2. For Tmin, it will show above normal in Week 1 and week 2. Special advisory: Always maintain a water level of two and half inch in boro paddy field. This should be followed for preventing node blast, neck blast, panicle blast and grain blast during extreme hot and dry weather of April month. Restrict movement inside the field during flowering for preventing damage of pollination. Spraying must be done during afternoon hours. Temp. is rising, for preventing tender fruit drop of papaya and mango apply ring irrigation during afternoon hours

SMS Advisory:

Temp. is rising, for preventing tender fruit drop of papaya and mango apply ring irrigation during afternoon hours

Crop Specific Advisory:

Crop (Stage)	Crop Specific Advisory
RICE	Boro paddy **Early planted: Mil stage or early milk stage **Late planted : Pannicle brusting stage --Pannicle blast, Node blast attack due to humid weather, temperature fluctuation, huge urea application and dense planting. -- Symptom: At the base of panicle , 1 to 2inch area blackening and flag leaf turn whitish. Symptoms look like stem borer attack but the panicle cannot be easily pulled up . This blast attack restrict the nutrient supply to the grain and grain become chaffy. • Apply compound fungicide Amister Top (Chemical composition : Azoxystrobin and Difenconazole) 1ml per liter of water and SAAF (Chemical composition : Mancozeb and Carbendazim) @2g per liter of water. Mix these two fungicide solution together in right composition and apply in clear weather condition. • Apply Nativo (Chemical composition : Azoxystrobin and Difenconazole) 1ml per liter of water and SAAF (Chemical composition : Mancozeb and Carbendazim) @2g per liter of water. Mix these two fungicide solution together in right composition and apply in clear weather condition.

Live Stock Specific Advisory:

Live Stock	Live Stock Specific Advisory
COW	Cattle All stages dehydration • As temperature is high avoid the cattle for free grazing during noon • Don't use pond water for drinking purpose use tube well water or tap water

Poultry Specific Advisory:

Poultry	Poultry Specific Advisory
CHICKEN	Poultry Grower and layer Effect of high temperature • Apply more water pot in the cage • Mix electrolyte with drinking water
