green manuring

- Deep summer ploughing should be done in harvested boro paddy field to destroy eggs and pupa of insects
- Take care green manuring crop like cluster bean, daincha etc after harvesting of boro paddy in order to fertilize the field and conserve moisture in soil
- As thunderstorm with heavy rainfall alert is there keep the harvested and dried paddy under safe place

Summer vegetables

Sponge gourd, okra, brinjal, cucumber

Flowering and fruiting

--Wilting due to water stagnation at base

1. Harvest mostly mature crops for marketing.
1. Don't apply any spray as rainfall alert is there.

2. Immediate drain out water from the furrow.
3. For preventing wilting apply fungicide after water removal from base of plants when sunny days will be there.

#### Poultry

##### Grower and layer

##### Fungal attack due to dump and rainy weather

- Keep the birds under safe place as extreme heavy rainfall alert is there.
- Spread old news paper with lime on the floor for preventing fungal infection.
- Apply only dry food and less number of water pot.

#### Guava, Papaya

##### Fruiting

##### Blackening of fruit due to wilting of plants

- Immediate remove water from base where heavy rainfall observed.
- Apply any fungicide by drenching soil around the base of plants during sunny days for preventing wilting.
